- The index is reconstituted and rebalanced quarterly in January, April, July and October.
- The securities selected for inclusion in the index are equally weighted. Index composition changes during scheduled reconstitutions are also subject to certain buffers designed to limit turnover
- The highest ranked 30 securities are selected for inclusion in the index. i. Additionally, the total number of index constituents classified to the Biotech Tools & Diagnostics sub-industry is capped at 6 constituents. If the limit is reached, the lowest ranked Biotech Tools & Diagnostics constituents are replaced with the next highest ranked Biotech Therapeutics non-constituents until this rule is met.
- Eligible securities are then ranked in descending order based on the following factors. These three distinct ranks are then combined to yield one comprehensive rank based on their respective weights: i. 50%: Net sales (revenue) over the last 12 months, ii. 25%: Ratio of net sales (revenue) to R&D (research and development) expenditures over the last 12 months, iii. 25%: Percentage change in R&D expenditures (over the last 12 months) from those three years prior.
- To be included in the index, a common stock or depositary receipt must be listed on a qualifying U.S. securities exchange, and meet the size and liquidity standards of the index
- The Biotechnology sub-industry group includes: i. The Biotech Therapeutics Sub-Industry: Companies engaged in the research and development of therapeutic treatments (including companies in the trial phase of therapeutic development), but are not focused on the commercialisation and mass production of pharmaceutical drugs, ii. The Biotech Tools & Diagnostics Sub-Industry: Companies engaged in the production and provisioning of tools, systems or processes that enable biotechnology practices (including companies that provide assaying equipment, sequencing techniques or systems, DNA processing, or cellular processing).
- The NYSE® Arca® Biotechnology Index is an equal dollar-weighted index designed to measure the performance of 30 leading biotechnology companies classified within the Biotechnology sub-industry group of the ICE Uniform Sector Classification schema.

Risks

- **The Fund may not achieve its investment objective and the value of shares in the Fund may fall.**
- Neither First Trust Global Portfolios Management Limited ("FTGPM") nor any of its affiliates, guarantees the performance or the future returns of the Fund.
- The Fund invests in biotechnology and pharmaceutical companies, which are subject to changing government regulation which could have a negative effect on the price, profitability and availability of their products and services. Biotechnology and pharmaceutical companies face increasing competition from generic drugs, termination of their patent protection and technological advances which render their products or services obsolete. The research and development costs required to bring a drug to market are substantial and may include a lengthy review by the government, with no guarantee that the product will ever be brought to market or show a profit. Many of these companies may not offer certain drugs or products for several years, and as a result, may have significant losses of revenue and earnings.
- There is no assurance that the Index will continue to be calculated and published on the basis described in the Prospectus. In addition, the Fund's return may not match the return of the Index.
- See also the description of the risks applicable to the Fund in "Risk Factors" in the Prospectus.
